

Easy Steps to Organize Your Linen Closet

Description

Organizing your linen closet is no longer a chore with these quick and easy steps! Youâ??ll love opening your closet and gazing at your neatly arranged linens. Even better, youâ??ll never be embarrassed when guests accidentally open the door to your messy closet on the way to the bathroom!

Linen can last you forever if you take care of it properly. Washing and drying your linens the right way is important, but so is storing them. Here are some of my tricks for simple and organized storage in just a few quick steps.

You may want to line wood shelves or boxes to prevent your linen from staining. Wood can stain delicate linen over time. Another option is to place folded linens in a box or on a rack to keep them organized while preventing any damage.

You can also place your linens inside boxes or tote bags to keep your closet tidy looking. They look a lot nicer stacked up that a bunch of crinkly plastic bags! This is a great way to organize similar linens for easy selection when you need them. A great tip is to organize your linens into smaller stacks by season or room. This way you wonâ??t end up with giant stacks of linen and you will find what you need much quicker.

If you really want to step up your linen closet, complete its makeover by placing labels on the outside of your boxes. This will make it extra easy for you to find linens in your closet.

These tips will help your closet look amazing! You stare in wonder at all the extra space you have after you shift things around a little bit. Just a few steps and your linen closet will look its best.

Did this inspire you to get more organized at home? Maybe youâ??ve got a couple new ideas! Got any tips we didnâ??t cover? Tell us know by leaving a comment on our blog or Facebook page!
