

Warlene Rene styling tips: OASIS Linen draped top worn five ways

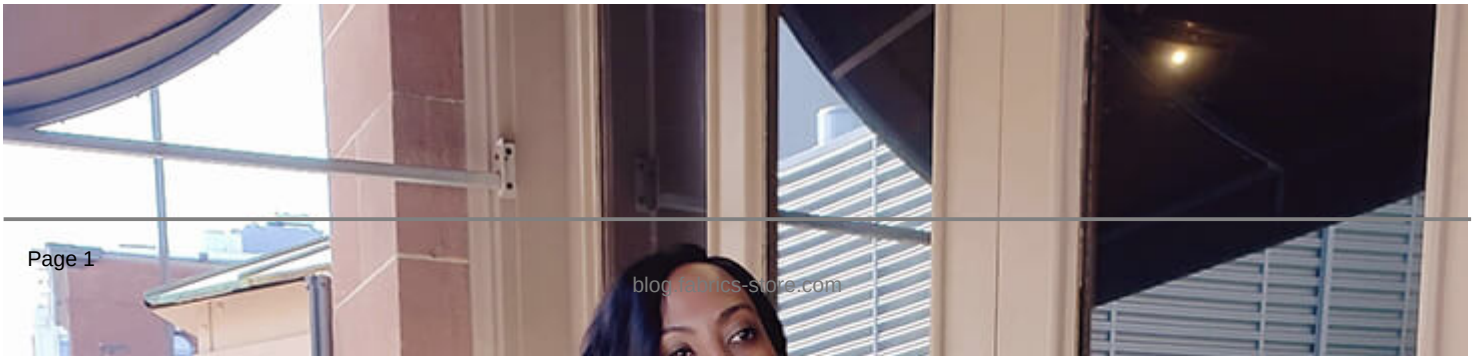

Description

In this new series, we are exploring how versatile one item of clothing can be, it is a reminder that we donâ??t necessarily need to have many clothes in our wardrobes, but instead, we can play and experiment with textures, accessories, stepping out of comfort zones and honouring our bodies and at the same time looking after the planet by not overbuying. This top has been made with FS OASIS Mid weight fabric, if you have questions on how to make it, please leave comments below. The top is perfect for summer and also great for fall layering. The bright earthy Oasis color works all year round.

Here are 5 ways to keep bringing this step to the next level.

Chic work outfit

Serving some fun in the office with this beautiful, draped blouse over leather trousers. To give it a further clean look I added leather ankle boots. For a more balanced and easy going feel, I did not wear too many accessories. It is a strong look but not too overwhelming, just the right balance. This outfit will flatter almost any figure.

Special event ready

Here Iâ??ve paired the top with a floral maxi skirt, itâ??s perfect for a special occasion. The options to accessorize this look are unlimited. I chose to draw interest to my neckline and the beautiful sleeve by adding a collar necklace, bangles, and statement earrings. Again, this silhouette will work with all figures.

Date night

Wearing the top with jeans gives this outfit a stretch, which is what I love about this look. I chose straight leg jeans for a fun and carefree flare. The straight leg also gives a good balance to the one shoulder sleeve. This style cut works very well for tall/medium height frames. For petit frames I recommend a Capri length or ankle length fitted jean or pant.

Business/meeting ready

I paired the linen top with these linen bell bottoms adds fun but still looks classy. A tied scarf around my waist adds interest and balance between the top and trousers. The feel I get here is business casual.

Cruising the city

Iâ??m just out having fun and making a statement while doing so. These leather shorts paired with the top are so carefree and easy to move around with. Here I could be headed to a cafe, brunch, get together, the fun settings are limitless. Who doesnâ??t love a good pair of shorts in the summer. I tucked the top in here and belted it which gives it an intentional fitted look but you could as easily leave it out and draped over the shorts for softness.
