

## How I Pick My Patterns

### Description

Some of us edge into garment sewing from a quilting or crafting habit, or perhaps someone's child needs a costume. I've seen people hang a piece of fabric on themselves and start cutting. I've had all of those starts, but none of it stuck until I picked up my first dress pattern.Â

Years down the line, lots of money wasted, lots of money well spent, plus hundreds of memade pieces behind me, I wanted to share my process for creating a great pattern stash.Â

## First comes the inspiration

Almost all of the patterns I find, I find on Instagram. Whether it's following my favourite pattern makers or keeping an eye on certain hashtags (like #memadeeveryday or #twopiecesetacular) it's a huge source of inspiration. When I find a pattern I like, I check the pattern hashtag to see all the versions that other makers have made, all the ways it's been hacked, how it looks in a variety of fabrics, all the checks that convince me it's a good investment pattern, not just a one-hit wonder. If I'm not sure, I follow the pattern hashtag to see if I get swayed either way. I also have a ton of inspiration saved to Pinterest boards so that I know what kind of styles I'm drawn to – otherwise it's too easy to get seduced by a trendy pattern and then realise it doesn't fit my style at all.

## Harrison Dress by The Patternline

### **And then comes love**

I have a lot of patterns and with it, a lot of overlaps in my collection. So now, when I find myself reaching for the buy button, I ask myself: what do I love about it? It could be a dart I don't have in my arsenal, the perfect shape of oversized jacket or shirt, even sometimes it's as simple as a type of seam I haven't tried before. If there's really nothing striking me about the pattern, then I try to put it to one side and see how often I find myself wishing it was in my stash. I picked the t because I loved the way the volume was created in the sleeves and it's all finished with distinct seam finishes like flat felled seams - it was great practice, by the time I'd finished I felt confident I could nail them the next time.

## Then I see how far it can go

I've started looking at patterns as a base – like a dress I can easily make into a top too, or remove the sleeves for hotter weather, even better, something I can easily shorten or lengthen for a whole new look. If you're braver than me, you might even partake in some slashing and spreading. I have so many patterns now that I really want each of them to work as hard as they can. If it's not versatile, it has to be something really special that I really need. The strapless dress pictured above works as a dress and a top, plus it's super easy to switch out the skirt section for a completely different silhouette. This one is in linen and I made another in a sparkly fabric and they look so different, you wouldn't think they're the same base pattern.

## Finally, I cover my basics

It's easy to zero in on the latest dress from McCalls, or fall in love with another wide leg trouser pattern (guilty) but I've never ever regretted a well fitting, hard working basic. I think it's important to think about the things you love to wear, especially if you're trying to wean yourself off RTW, and ensure you've got all of those bases covered. I have my go-to shirt, vest, simple trouser patterns that I pick up every time I'm missing a staple that works as a good palette cleanser project but also something I know I'll wear.

So, it's as simple as that. Would love to hear in the comments how you pick your patterns and where you find inspiration too! And keep an eye out of my next piece where I'll share some of my favourite patterns to make using Fabric Store's lovely linen collection.
