

A Handy Linen Sack Tutorial

Description

The Lush Green Sale is going on this week and I decided to get in the spirit of things with a craft using green linen.

This handy linen sack can be used in so many different ways. It is the perfect reusable bag for your sack lunch or a great way to store fruits in your home.

You'll find tons of ways to use your bag! I plan on making a few bags in different colors to use and give away.

This bag is made simply by sewing together two basic shapes- a triangle and a diamond. This is kind of geometry I don't mind! The two shapes come together to create a stylish and clean aesthetic that I absolutely adore.

Another thing I love about this bag is that it is perfect for anyone. Women *and* men can use this sack, as well as children. Unlike other crafts, this one can be enjoyed by everyone.

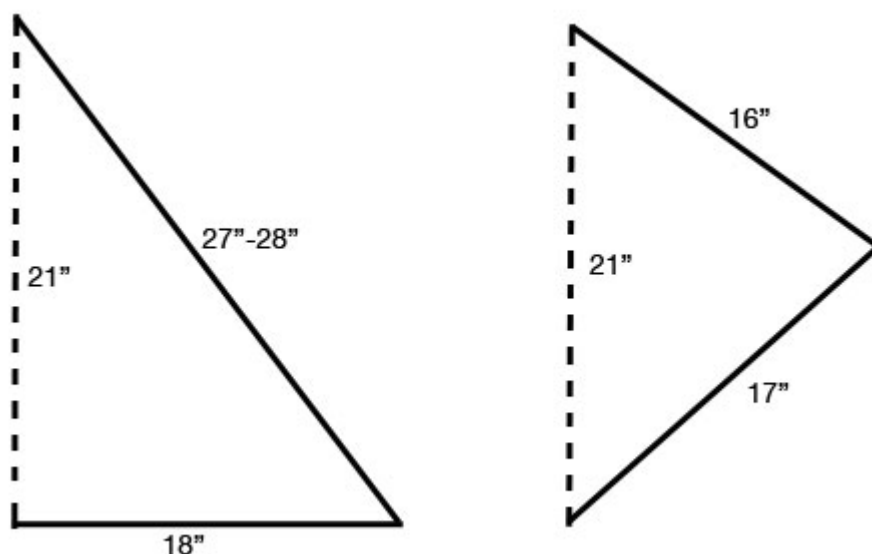

Materials:

- Linen
- Sewing machine
- Scissors

You can choose two different colors of linen or just one. Either way, we will be cutting two pieces. I think this project would look lovely with [Natural](#) flax linen too. In fact, I am going to make another in Natural linen soon!

I chose two of my favorite green shades in IL019 for my linen sack- [Hunter Green](#) and [Willow](#). This is an ideal time to get your green linen too. The [Lush Green Sale](#) offers every shade of green linen, so get shopping and take advantage of these low prices!

I usually buy my linen when it is on sale and add it to my collection of colors. You never know when you will need a certain color! Green is also a standard color that I need.....in multiple shades.

The pattern above shows how to cut your two pieces of fabric. The dashed line represent the fold in the fabric.

Cut one triangle and one diamond from your fabric using the measurements provided. You can alter these measurements to make a smaller or larger sack.

The only thing you need to remember to do is keep the length of the folded measurement the same for both shapes. In this case, that is the length that measures 21 inches for both pieces of linen.

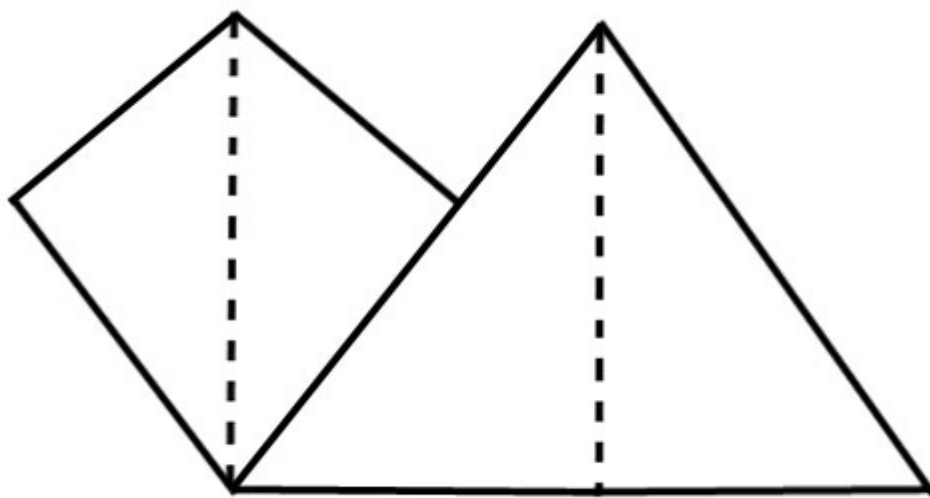

Cut your linen. One shape with unfold to be a diamond and the other will be a triangle.

Hem all the edges of your fabric before you start sewing them together.

Hemming the edges now makes things much easier. I just folded the edges inwards to create a small hem and then used the sewing machine to create the seams.

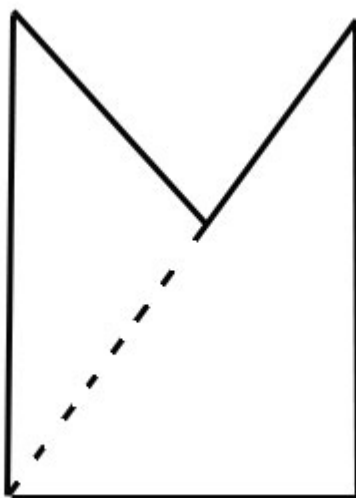

Sew the two pieces of linen together. The image above shows the placement of the pieces. The dashed line represents where the fold in the

linen was previously (there is probably still a crease there now).

Sew along the line where the two pieces touch like in the image above.

Make the seam from the inside in order to hide it (so flip the fabric inside-out to begin with). That is the first seam- only one two more to go!

To make the next seams, fold both outside corners toward the center.

When you fold the corners toward the center, you should end up with something that looks like the image above. The dashed line shows you where you need to make a seam to attach the two pieces.

Sew this from the inside (so have everything inside-out) that way the seam is hidden. Now just make a seam along the bottom of the sack. That's the last step!

This is what the connected pieces should look like from the outside. I love these two colors together!

This is what the the back looks like when it is all complete. It definitely made me recall some of my old geometry lessons at first, but I could not be happier

with the result.

I love crafts like this that are simple and have a clean aesthetic. It is something I will enjoy using all the time.

I made a few small stitches in some dark green thread that adds a little detail. I just stitched it with my sewing machine it placed it near the crease where the two colors meet. It adds a small detail that I kind of like against the light Willow green. This step is optional, so feel free to leave it out if you like.

Now you can fill your bag with whatever you like. It makes a great bag for fruits and veggies. It would also be a great reusable bag for a sack lunch. Get creative with different colors and sizes with this easy craft! I hope you all liked this craft as much as I did!
